80 Shot

Official Shot / Challenge Program

Shot Program and Selection

1. For each degree of difficulty (DOD; point value) in each discipline, players will select one shot (a or b). Therefore, players will select 5 shots in each discipline and shoot a total of 40 shots.
2. Players are locked into the selection once they take a legitimate stroke at the shot. Warm up strokes and accidentally nudging a ball with the cue tip do not constitute a legitimate stroke.
3. Players will receive three attempts to make each shot. Players may only make each shot once.
4. Scoring: players will receive the full DOD value if the shot is made on the first attempt, the DOD value minus one if the shot is made on the second attempt, the DOD value minus two if the shot is made on the third attempt, or zero if the shot is not made on any attempt. Exception: Shots with special scoring, as outlined in the shot program. (Discipline 2 – Shot 4; see scoresheet)

Tournament Format

1. Players will be divided into groups of 2, 3, or 4 players, depending on the number of total entrants and tables available. Groups will be determined at the players meeting or earlier.
2. Each group will play four rounds. Each round will consist of two shot disciplines grouped as follows: 1 and 2, 3 and 4, 5 and 6, and 7 and 8. The order of the grouped disciplines is at the discretion of the tournament director.
3. Before each round, players will receive a set number of minutes for practice time on the tournament table. The amount of time will be decided at the players meeting or earlier. Typical practice time is five minutes.
4. Playing order will consist of a 'rotating lead off' process. See 'Play Order' below.

Standings and Tiebreakers

1. Player's total point score after shooting 40 shots will determine the preliminary standings.
2. Discipline champions will be determined based on player's total points in a given discipline.
3. If players are tied on point value for either overall ranking or discipline champion then a playoff format will be used to determine the discipline champion and overall standing.

Standings Tiebreaker- If two players are tied after the 40 shot Prelims, they will do a sudden death playoff tiebreaker. Players will lag to determine who shoots first. Players will shoot one shot of their choosing from anywhere in the shot program. The shot scoring will be the same. The player with the highest score after each player has attempted a shot will be the winner. If players are still tied after one sudden death playoff shot, the tied players will pick another shot of a different discipline than their original shot(s). Players will continue until there is a winner.

Discipline Tiebreaker- Players that are tied for the highest score in a discipline will compete in a playoff tiebreaker. Players will lag to see who goes first. Each discipline will have an initial tiebreaker shot that is known to that discipline. If players are still tied after the initial shot, a 10 point shot will be drawn. If there is still a tie after the first 10 point shot, another 10 point shot is drawn. If there is still a tie and all the 10 point shots have been attempted, the 9 point shots will be used and so forth. If more than 1 player scores a perfect 40 in a discipline, the players will share the title. Both will be awarded a medal and both will receive the 1 ranking point. Below are the initial Discipline Tiebreaker shots:

Discipline 1 Trick & Fancy- 3B (Just Showing Off)

Discipline 2 Special Arts- 3B (The Over & Under Shot)

Discipline 3 Draw- 5B (The Circular Draw)

Rules of Artistic Pool

A. General Rules

1. The player is responsible for knowing the setup and requirements set forth in the shot program. All questions should be resolved prior to the match with the tournament director.
2. All shots will be judged based on the intent of the shot. If any loophole is found that changes the intent of the shot, those changes to the shot will not be allowed.
3. A full, intentional stroke counts as an attempt. Accidentally nudging the cue ball does not count as an attempt.
 1. *Exception 1:* Wing shots, once a ball is rolled, it counts as an attempt.
 2. *Exception 2:* Any shot requiring multiple hits. The first full, intentional stroke counts as an attempt. Subsequent cue contact with the cue ball or object balls count as a hit. For example, if the shot calls for the cue ball to be hit twice, nudging the cue ball on the second hit counts as a hit.
 3. On shots requiring multiple hits, after the initial hit, players may take as many strokes as necessary to complete subsequent hits. For example, if the shot calls for the cue ball to be hit twice, a player attempting the second hit but completely missing the cue ball may take another stroke to try to hit the cue ball as long as other parameters of the shot are met.
4. Table judge's and tournament director's decisions are final.

B. Ball and Prop Placement and Positioning

1. Any balls or object specified as 'ball-in-hand' may be placed anywhere on the table, provided that the intent of the shot is preserved.
2. Any balls or object specified as 'ball-in-hand' but has additional positioning requirements may be adjusted freely by the player provided that the additional requirements are met.
3. All balls specified as 'hanging near a pocket' may be freely adjusted by the player near that pocket within 1 balls width of the pocket cut.
4. Any object or ball that must be positioned within a zone must be completely in that zone.
5. Any ball that must come to rest within a zone will be considered in that zone if any part of the ball is within the zone, measured by the edge of the ball. One the line is considered in the zone.
6. All chalk cubes placed on the table must be well up, and must be square with the table (may not be rotated), unless otherwise stated.
7. Chalk cubes may be positioned anywhere on the rail at the player's discretion.
8. All measurements of 1 chalk's width will be measured with a cube of chalk held at mid-ball height (the widest part of the ball), unless otherwise stated.

C. Shot Allowances and Restrictions

1. It is always okay for a ball to contact an extra cushion near a ball hanging in a pocket, unless otherwise stated.
2. It is always okay for the cue ball to scratch, unless otherwise stated.
3. If there is a helper ball – hanging ball combination, it is always okay for the cue ball to contact either the helper ball or hanging ball directly. Rules 1 and 2 still apply.
4. Extra contact between balls is not allowed, unless otherwise specified.
5. At no time may any ball (cue ball or object ball) or prop fly off the table.
6. Players are free to shoot the mirror image of any shot. Please note that rotating a shot 90 degrees is not the mirror image and will not be allowed.

7. Players are free to shoot any part of any shot with either hand.
8. Players may not switch cues during a shot unless otherwise specified or due to equipment failure. Players may switch cues between attempts.
9. Players must keep at least one foot on the floor when shooting. It is allowable for a player to “raise the floor” using any object.

D. Equipment

1. All cues must be a minimum of 40 inches in length.
2. Players are allowed to place chalk or other objects underneath the bridge head, or bridge butt, as needed provided those other objects do not interfere with the shot.
3. All vertical masse shots will require the use of a masse cloth (extra piece of standard cloth) or the Stefano Pelingia Cloth Shield.
4. If a masse or break cloth is required for a shot, the player has the option of removing the extra cloth from the table during the course of the shot. If the player disturbs anything other than the cloth in this process, it will be a foul and count as a missed attempt.

In hand within the 1x1 diamond zone.

Object Balls

1 ball in hand within the 1x1 diamond zone. 8 ball is a special stacking ball near pocket 'F'. 9 ball is balanced on top of it. 4 balls are frozen in line on the 1st diamond, with the first ball frozen to cushion 1. 5 balls are frozen in line on the 1st diamond, with the first ball frozen to the head cushion.

Objective

Shoot the cue ball into the 1 ball, causing it to roll towards the stacked balls. Re-hit the cue ball, jumping it over the 1 ball. The cue ball will make the 8 ball (bottom ball), and get of the way. The 1 ball will then make the 9 ball, which fell in place.

Special Notes

The cue ball, 1 ball, and stacked balls must all be in line. The blocker balls may not be contacted by any means until after the 8 ball is made. The 9 ball must be made by the 1 ball. It may not fall on its own or be made by the cue ball. After the initial contact between the cue ball and 1 ball, the 1 ball may not contact any other ball until it hits the 9 ball.

7 ft Adjustment

Only 3 blocker balls will be used on each diamond line.

MASSE SHOTS

Discipline 8 – Shot 1a – 6 points

Cue Ball

In hand within one ball width of head cushion and between rack and line 'X'.

Object Balls

'A' ball is hanging in pocket 'A'.

A rack is in hand with one edge frozen to head cushion.

Objective

Masse cue ball around the rack to make 'A' ball.

Special Notes

Cue ball may contact rack at any time.

Cue ball may contact cushions 1 and 2 only.

Cue ball may not come back by hitting point of pocket 'B'.

Discipline 8 – Shot 1b – 6 points

Cue Ball

Frozen to cushion 3 – one diamond from pocket ‘E’.

Object Balls

An object ball is hanging in pocket ‘D’.

One blocker ball is frozen to cue ball, directly in line along the diamond line. One blocker ball is frozen to cushion 3 at 1½-diamond segments from pocket ‘D’.

Objective

Masse the cue ball such that it escapes from between the blocking ball and rail and curves around the other blocking ball to make the object ball hanging in pocket ‘D’.

Special Notes

The blocking balls may not move by any means until the shot is complete.

Discipline 8 – Shot 2a – 7 points

Cue Ball

Frozen to cushion 3 and to two other object balls next to it as diagrammed.

Object Balls

Three object balls are to the left of the cue ball, all frozen in line and to the cushion. 11 object balls are frozen in line exactly 1 ball's width from cushion 3. The 11th ball is frozen to the object ball that is next to the cue ball. The 1st object ball in line may start anywhere to the left of the B-E center line. 'E' ball is hanging near pocket 'E' and is adjustable.

Objective

Masse the cue ball, causing the three balls to the left of the cue ball to move. The cue ball will masse back and finally make 'E' ball.

Special Notes

The cue ball must make 'E' ball, not another object ball. There is no requirement on how many balls must move, but players must setup the shot with the line of balls exactly 1 ball's width off the cushion, and they must execute the shot with a full (or close to full) masse stroke.

Discipline 8 – Shot 2b – 7 points

Cue Ball

In hand, behind head string.

Object Balls

'F' ball is frozen to cue ball, in hand behind head string.

'C' ball is hanging in pocket 'C'.

A blocker ball is on the diamond intersection, as diagrammed.

Objective

Make 'F' ball in pocket 'F'. Cue ball will follow the indicated path and make 'C' ball.

Special Notes

The blocker ball may not be contacted by any means until shot is complete.

Discipline 8 – Shot 3a – 8 points

Cue Ball

On the first diamond line, no more than 1 chalk's width from the cushion.

Object Balls

1 ball is in hand, but must be at least 1 chalk's width from the cue ball. The 2 and 3 balls are in hand near pocket 'E'.

Objective

Masse the cue ball, making the 1 ball in pocket 'D'. The cue ball will masse back into the 2 ball, making it in pocket 'C' and making the 3 ball in pocket 'E'.

Special Notes

Players must use a full masse stroke for this shot. They may not use a draw stroke.

Discipline 8 – Shot 3b – 8 points

Cue Ball

Frozen to foot cushion at second diamond.

Object Ball

F ball combo is hanging in pocket 'F'.

A blocker ball is on the foot spot.

Objective

Masse the cue ball around the blocking ball, hitting the head cushion and cushion 1, and making the F ball in pocket 'F'.

Special Notes

The cue ball may contact an extra cushion by pocket 'F'.

The blocker ball may not be contacted by any means until 'F' ball is pocketed.

Discipline 8 – Shot 4a – 9 points

Cue Ball

In hand within the rack.

Object Balls

An object ball is hanging near pocket 'F'. A rack is placed frozen to the foot cushion as diagrammed.

Objective

Hit the cue ball with a jump masse stroke. It will jump out of the rack, turn around and come back to make the object ball in pocket 'F'.

Special Notes

The rack may not be touched when the cue ball is jumping out of it, but it may be contacted when the cue ball comes back to make the object ball. The cue ball's trailing edge must completely pass the 2nd diamond line. The cue ball may contact cushion 3 or 4, but none other until 'F' ball is made. The cue ball may not come back because it hit the far pocket point of pocket 'E'. Decision by the referee is final.

Discipline 8 – Shot 4b – 9 points

Cue Ball

In hand along the 1st diamond line.

Object Balls

A blocker ball is frozen to the head cushion at the 2nd diamond.

Two balls form a combination near pocket 'D'.

Objective

Shoot the cue ball so it follows the indicated path, hitting cushion 1 and head cushion before making the combination.

Special Notes

The blocker ball may not be contacted by any means until combination is made.

Discipline 8 – Shot 5a – 10 points

Cue Ball

In hand within the indicated zone.

Object Balls

'C' ball combo is at pocket C. A piece of chalk is placed square to the table along the head string, exactly $1\frac{1}{2}$ diamonds from cushion 1.

Objective

Masse the cue ball around the chalk, along the indicated path, and make 'C' ball combo.

Special Notes

The chalk may not be contacted by any means until after 'C' ball is made. The cue ball may not contact the head cushion until after 'C' ball is made.

Discipline 8 – Shot 5b – 10 points

Cue Ball

In hand, frozen to 'B' ball.

Object Balls

'B' ball is in hand near pocket 'B', but must be to the left of the B-E center line. 'D' ball combo is hanging near pocket 'D'. 13 blocker balls are placed along the long center line of the table. The first ball is frozen to the head cushion. The last ball is on the exact center spot of the table. The other balls are evenly spaced.

Objective

Masse the cue ball, making 'B' ball. The cue ball will travel around the blocker balls as diagrammed, and make 'D' ball combo.

Special Notes

The blocker balls may not be touched by any means until after 'D' ball is made.

Tiebreaker Shot / Challenge

Cue Ball

The cue ball is in hand and anywhere behind centerline ('B' – 'E').

Object Balls

No object balls are in this challenge. A dollar bill is placed on the table so that its edge is even with the head cushion nose. The center of bill is halfway between pocket 'D' and the 1st diamond from pocket 'D'.

Objective

Tied players will get 1 attempt to shoot the cue ball 8 or 9 cushions in diagram pattern to dollar bill. The player that lands his or her cue ball closest to the center of the dollar bill wins this challenge. Table judge decision is final.

Special Notes

Tied players will lag to determine who goes first. Winner of lag has choice of shooting first or last.

Cue ball must contact either the 8 or the 9 cushions. Contact with one is required. Contact with both is optional. In other words, an exception to the diagramed cue ball travel may result if the head cushion is hit as the 8th cushion and the #3 cushion is not hit near pocket D. In addition, cue ball may hit cushion #4 as the 5th cushion hit.

The vertical edge of the cue ball closest to the dollar bill center will determine the "measured" distance for comparing all player rolls.

If none of the tied players hits 8 or 9 cushions, then the shot will be done over with another lag between the tied players to see who goes 1st with the lag winner having choice again of shooting first or last.
